

# Global Action Week for Education

(from 25<sup>TH</sup> to 30<sup>TH</sup> april)

The GAWE (Global Action Week for Education) 2016, whose slogan is “**Education takes care of us so we must protect its financing**”, wants to call our attention on the role of protection that education has on girls and boys.

- ✓ **takes care of people against poverty.**
- ✓ **strengthens our abilities.**
- ✓ **makes us freer.**
- ✓ **looks after people in contexts of emergency and conflicts.**
- ✓ **builds peace.**
- ✓ **promotes social participation.**
- ✓ **favors the gender equality.**
- ✓ **improves health and family wealth care.**

This protection cannot be granted without a real **compromise of the states in order to fund it**. This is the reason why this GAWE **advocates our rulers for robust funding** to fulfill the compromises that we acquired **to grant the Right to Education for all people**.

We need to **have committed and active citizens**, able to **mobilize and influence on society**, to press governments and the international community to reclaim that **Education becomes a real tool to protect girls and boys**.

Do we know about the effects that our daily actions have on the environment?

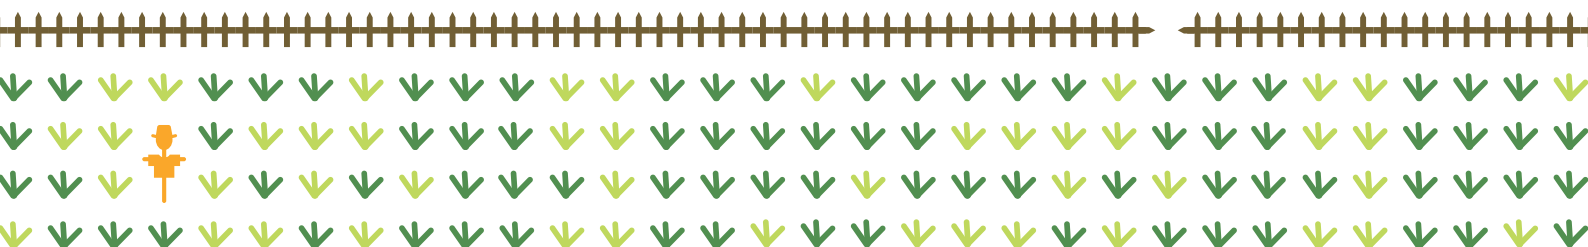

The students in the first year of Management and Finances Higher Education in the Salesian School San Juan Bosco from Morón de la Frontera make us think about how the little decisions we take daily have effects on our environment thanks to the short story they have created.

**Which raw is used to make plastic?**

**How can we reduce our use of plastic?**

You can see the short story “**Made of plastic**” on this link

## THE HEN OR THE EGG

We can work empathy with our students thanks to the love story of a pig, who loves fried eggs, and a hen.

## TALES ABOUT ENVIRONMENT

You can find four tales which deal with the environment on this link:

🔗 ENLACE -> [OW.LY/ZKCAZ](https://ow.ly/zkcaz)

# **ALARGASCIENCIA.** Establishments where we can repair, exchange, rent and lend.

**Alargasciencia is an idea that the Ecology Association “Friends of the Earth”** has had in order to improve the local and global change thanks to which our society will be fair, caring and worried about the environment.

We are aware of the fact that **nowadays products are less long-lasting and more difficult to repair and reuse.** This website proposes different options **to enlarge the useful life of products.** As a consequence, we can reduce the consumption of natural resources.

**Alargasciencia is a directory of establishments where you can repair objects and rent them. In addition to this, you cannot only do barter but also find and sell second-hand products.** What is more, it helps you to find those small shops and cooperatives which are closer to your home and provides you with this kind of services.

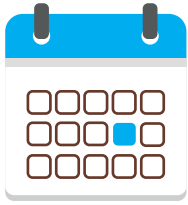

**KEEP AN EYE ON YOUR CONSUMPTION!!**
